

AMENDMENTS TO THE CLAIMS

Please amend Claims 1, 12, 18 and 23.

- 1 1. (currently amended) Motorcycle luggage for removable attachment
2 to a sissy bar of a motorcycle, said luggage comprising:
3 an enclosure having a front, a back, a top, a bottom, and opposing
4 lateral side walls; and
5 an adjustable, closed ended pocket nonremovably affixed to said
6 front of said enclosure, said adjustable pocket expandable from a closed
7 position to an open position, said adjustable pocket being configurable to
8 securely accommodate ~~the sissy bar~~ a plurality of different sized sissy bars.
- 1 2. (original) The motorcycle luggage of Claim 1, wherein said
2 adjustable pocket comprises at least one fastening mechanism, permitting
3 said adjustable pocket to be expanded from said closed position to said
4 open position and collapsed from said open position to said closed position.
- 1 3. (original) The motorcycle luggage of Claim 2, wherein said
2 fastening mechanism comprises at least one zipper.
- 1 4. (original) The motorcycle luggage of Claim 1, wherein said
2 adjustable pocket further comprises at least one adjustable strap attached to
3 said pocket for securely tightening said pocket around the sissy bar.
- 1 5. (original) The motorcycle luggage of Claim 1, wherein said pocket
2 has a top edge affixed to said front of said enclosure, a bottom edge and
3 opposing lateral side edges, each of said lateral side edges expandably
4 secured to said front of said enclosure with a fastening mechanism for
5 adapting said pocket to tightly secure the sissy bar.

- 1 6. (original) The motorcycle luggage of Claim 1, further comprising
2 quick release straps attached to said enclosure and adapted to engage the
3 motorcycle.
- 1 7. (original) The motorcycle luggage of Claim 1, further comprising at
2 least one wheel rotatably secured to one of said bottom, said front and said
3 back of said enclosure to facilitate movement of said luggage.
- 1 8. (original) The motorcycle luggage of Claim 1, further comprising a
2 handle attached to one of said top, said front and said back of said
3 enclosure.
- 1 9. (original) The motorcycle luggage of Claim 8, wherein said top of
2 said enclosure includes a handle seat formed therein, and wherein said
3 handle is attached to said top of said enclosure, said handle movable
4 between a retracted position wherein said handle rests within said handle
5 seat, and an expanded position wherein a portion of said handle projects
6 from said handle seat.
- 1 10. (original) The motorcycle luggage of Claim 1, further comprising at
2 least one storage compartment.
- 1 11. (original) The motorcycle luggage of Claim 10, further comprising a
2 rain cover disposed within said storage compartment.
- 1 12. (currently amended) A motorcycle travel bag comprising:
2 an enclosure having an interior storage compartment and an exterior
3 surface; and
4 an expandable pocket mounted to said exterior surface of said
5 enclosure, said pocket including front, back, side, and bottom sections
6 defining a closed ended cavity for accommodating a sissy bar of a

7 motorcycle, said cavity having a variable capacity and an adjustment
8 mechanism for varying the capacity of said cavity to tightly secure the sissy
9 bar within said pocket.

1 13. (original) The travel bag of Claim 12, wherein said adjustment
2 mechanism includes at least one zipper.

1 14. (original) The travel bag of Claim 12, wherein said expandable
2 pocket further comprises at least one adjustable strap attached to said
3 pocket.

1 15. (original) The travel bag of Claim 12, further comprising at least
2 one handle mounted to said enclosure.

1 16. (original) The travel bag of Claim 15, wherein said handle is an
2 extendable handle having a retracted position and an extended position.

1 17. (original) The travel bag of Claim 12, further comprising at least
2 one wheel rotatably mounted to said enclosure.

1 18. (currently amended) A motorcycle bag configured to removably
2 mount to motorcycle seat backs of different dimensions, said bag
3 comprising:

4 an enclosure having an exterior surface and an interior compartment
5 for storing items;

6 an expandable receptacle affixed to said exterior surface of said
7 enclosure, said expandable receptacle comprising a cavity having a closed
8 top portion, an open bottom portion, a variable capacity and a closure
9 mechanism for varying said capacity, wherein said expandable receptacle is
10 nonremovably mounted to said enclosure; and

11 at least one strap attached to said enclosure, said strap including a
12 fastening mechanism.

1 19. (original) The bag of Claim 18, wherein said expandable receptacle
2 is a pocket.

1 20. (original) The bag of Claim 18, wherein said closure mechanism
2 includes at least one zipper.

1 21. (original) The bag of Claim 18, further comprising at least one
2 wheel rotatably mounted to said enclosure.

1 22. (original) The bag of Claim 18, further comprising a rain cover
2 attached to said enclosure.

1 23. (currently amended) Motorcycle luggage configured to removably
2 mount to motorcycle seat backs of different dimensions, said luggage
3 comprising:

4 a bag having an exterior surface and a storage compartment
5 therewithin; and

6 a variable luggage mounting system integrally and permanently
7 secured to said exterior surface of said bag, said luggage mounting system
8 including an expandable pocket having a closed top portion and a collapsed
9 configuration and an expanded configuration, said pocket further
10 comprising a closure mechanism for allowing said pocket to be expanded
11 from its collapsed configuration to its expanded configuration and to at
12 least one intermediate configuration between its collapsed configuration
13 and its expanded configuration, wherein said pocket is configured to

14 accommodate a plurality of different sized sissy bars of different
15 dimensions.

1 24. (original) The motorcycle luggage as defined in Claim 23, wherein
2 said pocket has a top edge affixed to said exterior surface of said bag, a
3 bottom edge and opposing lateral side edges, each of said lateral side edges
4 expandably secured to said exterior surface of said bag with a fastening
5 mechanism for adapting said pocket to tightly secure a seat back of a
6 motorcycle.
